Introduction: This Grade 6 Earth Science Unit focuses on earthquakes and volcanoes and is recommended to be taught following the Grade 6 Earth Science Unit: Plate Tectonics. Earthquakes and volcanoes are two of the visible signs of plate tectonics. The unit addresses the California Science Standards for 6th grade for the topics of Earthquakes

Grade 6.05 Intro-Earthquakes and Volcanoes  
Volcanoes are a vibrant manifestation of plate tectonics processes. Volcanoes are common along convergent and divergent plate boundaries, but are also found within lithospheric plates away from plate boundaries. Wherever mantle is able to melt, volcanoes may be the result.Volcanoes erupt because mantle rock melts.

Volcanoes | Earth Science - Lumen Learning  
Supervolcanoes. Supervolcano eruptions are extremely rare in Earth history. It ' s a good thing because they are unimaginably large. A supervolcano must erupt more than 1,000 cubic km (240 cubic miles) of material, compared with 1.2 km 3 for Mount St. Helens or 25 km 3 for Mount Pinatubo, a large eruption in the Philippines in 1991. Not surprisingly, supervolcanoes are the most dangerous type ...
