for naming unit test classes and test methods? This was discussed on SO before, at [What are some popular naming conventions for Unit Tests?](#). I don't know if this is a very good approach, but currently in my testing projects, I have one-to-one mappings between each production class and a test class, e.g. Product and ProductTest.

The JUnit Platform serves as a foundation for launching testing frameworks on the JVM. It also defines the TestEngine API for developing a testing framework that runs on the platform. Furthermore, the platform provides a Console Launcher to launch the platform from the command line and a JUnit 4 based Runner for running any TestEngine on the platform in a JUnit 4 based environment.
