The `ParentNode.append()` method inserts a set of Nodeobjects or DOMStringobjects after the last child of the ParentNode. DOMStringobjects are inserted as equivalent Textnodes.

`ParentNode.append()` - Web APIs | MDN

There have been occasions where I've wished I was able to select a parent element with CSS—and I'm not alone on this matter. However, there isn't such thing as a Parent Selector in CSS, so it simply isn't possible for the time being. In this tutorial we will walk through a few cases where having a CSS parent selector might come in handy, along with some possible workarounds.

Selecting Parent Elements With CSS and jQuery

JavaScript. ardentmirage. August 30, 2014, 4:10am #1. Hi, I have a popup that contains a form. When I submit that form, I need 1) the data to get saved into my database, 2) the popup to close, and ...
