Regularity of solutions to quasilinear elliptic systems extending earlier results on the form boundedness problem for the Schrödinger operator to  $p \in [2, \infty)$ . 1. Introduction This paper concerns a study of weak solutions to certain quasilinear elliptic equations, and closely related integral inequalities with distributional weights. Let  $\Omega \subset \mathbb{R}^n$  be an open set, with  $n \geq 1$ .

Regularity Problem For Quasilinear Elliptic And Parabolic ... I'm trying to understand how to establish regularity for elliptic equations on bounded domains with Neumann data. For simplicity, let's presume we are focusing on  $-\Delta u = f$  in  $\Omega$  and  $\frac{\partial u}{\partial \nu} = 0$  on  $\partial\Omega$ . Interior regularity works the same as always.

Fine Regularity of Solutions of Elliptic Partial ... Quasilinear elliptic double obstacle problems with variable exponent and logarithmic growth are studied. We obtain a global Calderón-Zygmund estimate for such an irregular obstacle problem by proving that the gradient of the solution is as integrable as both the nonhomogeneous term and the gradient of the associated double obstacles under minimal regularity requirements on the elliptic ...

Regularity Problem for Quasilinear Elliptic and Parabolic ... QUASILINEAR ELLIPTIC EQUATIONS 127 Here, we overcome this difficulty by reducing the general regularity result to  $C^{1,\alpha}$ -estimates, where  $\alpha$  is supposed to be an  $L^\infty$ -function. With the aid of these a priori bounds, the existence of smooth solutions with prescribed Hölder-continuous boundary data is established for "sufficiently small" subregions of  $\Omega$ .

Calderón-Zygmund estimates for quasilinear elliptic double ... In mathematics, an elliptic boundary value problem is a special kind of boundary value problem which can be thought of as the stable state of an evolution problem. For example, the Dirichlet problem for the Laplacian gives the eventual distribution of heat in a room several hours after the heating is turned on. Differential equations describe a large class of natural phenomena, from the heat ...

Regularity Problem For Quasilinear Elliptic Introduction. The smoothness of solutions for quasilinear systems is one of the most important problems in modern mathematical physics. This book deals with regular or strong solutions for general quasilinear second-order elliptic and parabolic systems. Applications in solid mechanics, hydrodynamics, elasticity and plasticity are described.

Interior  $C^{1,\alpha}$  regularity of weak solutions for a ... In this paper, we consider the regularity of degenerate elliptic quasilinear equations in the form:  $\sum_{i,j} a_{ij}(x, u) u_{ij} = f(x)$  where  $a_{ij}(x, u) \in C(\mathbb{R}^n \times \mathbb{R})$ , semi-positive. Our study of the problem is motivated by the regularity problem for degenerate Monge-Ampère equations  $\det(u_{ij}) = k(x)$  where  $k$  is a nonnegative function. When  $n=2$  ...
