703. Engine Control System Diagram
The default aircraft panel has a Tachometer with a 2700RPM redline. As a result I have taken the decision to model the C152 with the corresponding and slightly uprated 115HP engine. (It is essentially the same engine as the 'standard' C152 Lycoming engine with 110HP redline, with a few extra horsepower gained from the additional RPM.

This is now common practice in the kit helicopter industry. The Exec 90 uses the RI 162 engine, which is designed and produced by Rotorway in the late 1980s, Rotorway introduced the Eleete. Unfortunately, this model was a commercial disaster and, with its high development costs, Rotorway in trouble.

Operation and maintenance manuals - Perkins Engines
A small number of helicopters such as most amateur-built types (for example the Rotorway Exec) do not require specific training and are rated by the single-engine helicopter class rating. However, pilots should consider undergoing training in that type of aircraft to make sure they are competent - refer to the general competency rule (regulation 61.385 in the Part 61 Manual of Standards).

Rotorway For Sale - Rotorway Helicopters - Aero Trader

Rotorway calls its system a fully automated digital engine control system (Fadec) — not to be confused with the turbine world's full authority digital engine controls. For the new Exec 162F, the engine gains a new induction system with long tuned intake runners for good low-end torque and replaces the Exec 90's two-throat Weber carburetor and coolant-heated plenum chamber.

Rotorway 152 Engine File Type

1960–1970. In 1961, RotorWay's founder, B.J. Schramm, tested the company's first prototype, the Javelin. The Javelin used a 40 hp (30 hp) motorcycle engine, and was the forerunner of RotorWay's first production helicopter, the Scorpion, which was offered in 1967.. The Scorpion was priced at \$6,300 (not including the cost of the engine), was the first real kit helicopter on the market that flew.
