The objective is to check every endpoint before it is given network access to ensure it meets certain security criteria. This solution requires additional network and server infrastructure to validate the endpoint and then allows it to access the entire network. Windows Server 2008 provides a role for this and Windows 7 has improved on the agent.

Server Infrastructure - an overview | ScienceDirect Topics

We kick off a new series with an overview of server infrastructure tools. Life around servers is rarely that simple. A sys admin in a large server room, or rooms, will most likely need tools to help him or her keep the servers running effectively. This is where software to manage, monitor, and configure the server infrastructure comes in.
